## Asus zenfone 4 selfie pro android update

Update (1/06/20@11:20 ET): After you lose dropping plans to update Zenfone 4 in Android pie, ASUS surprisingly rolled out another beta. Taiwanese smartphone manufacturer Asus launched the ZenFone 4 back at the end of 2017, running Android Nougat out of the box. The device was then updated to Android Oreo shortly afterwards. Early this year, in the joy of ZenFone 4 properties worldwide, the company rolled out an Android pie update for the device. However, the joy was shortened, as Asus has now officially fallen plans for the Android Pie update. As reported by Android Police, the Asus ZenFone 4 will not receive an official Android pie update after all. In a recent post on the company's ZenTalk forum, the company revealed that in order to preserve the system performance and stability of Zenfone 4 (ZE554KL), ASUS does not plan to further upgrade Android 9 (pie), but will continue to keep in Android Oreo. Asus further noted that users could still install latest Android Pie releases on their device, however, the company would not support the release and routine updates. This news has been met with strong criticism from the community, and users vomiting never buy another smartphone from the company. The ZenFone 4 is the mid-range option of the company line for 2017. It features Qualcomm snapdragon 630 soc, 4GB of RAM, 64GB of storage, and a 5.5-inch FHD display. The device has two cameras on the back (12MP + 8MP wide-angle), and an 8MP shoot selfie. The device is backed by a 3,300mAh battery. The device was launched together with the ZenFone 4 Pro and the ZenFone 4 Max. As of now, we have no information about the company's plans to release updates for the two devices. Source: Asus | Via: Android Police Update: Surprise Beta Fter originally dumped plans to send an Android Pie update to the Zenfone 4, ASUS seems to have reversed its plan as they rolled out a second Android pie beta. The change is very short, but this was an unexpected update. It fix an issue that some people had random rumors about phone calls and sound notifications. Download from the support site below. Build Number: WW-16.0620.1910.19 Update Google patch Fixed random noise audio on phone dial and notification sound: ASUS | Via: Reddit b Im sort of loved Asus since the middle of last year. Don't be too worried about the Android updates. They offer good value phones for the money. Rocking with a max Pro M2 and not sorry so far. Just the build quality and screen on the bottom. Otherwise its great. Waiting for a flagship release this year, might want to give a try since they're affordable and great value. Which mobile Asus Zenfone max pro M1, when will be updated Android Pie 9? D Pls do upgrade to M2 Pro A I have xinfone AR (chips), and I'm still on Android 7. Never again from Asus D Here we go again. To avoid getting hurt, just don't expect much from them.. H Please update Android Pie to my max m1 Pro please Asus. D it max plus doesn't even have lollipop update till now! H-1, 27 Feb 2019 Highly unlike in Asus budget phone update and left the top dogs. A lot of skin a... more missing asus.. I'm using huawei mate 10,i use this device because it can continue tv using hdmi cable.. To be honest I want to buy asus again A I never think that Asus will give the pie update too late to Zenfone maxpro m1 when the update will be provided please confirm the date I am ZA550KZ and ZA550KL the same? O9021 too slow with the update, but better late than never P When came the pie update of zenfone max pro m2? will Zenfone MAX Pro M2 come with the latest Android 9 pie update?? ? What about Asus selfie lite? Updated to pie H723257 Ardiant, 27 Feb 2019 So which means there are no latest Android pie news for Zenfone 4 (ZE554KL), Zenfone 4 Selfie Pro (ZD5... more Highly unlike in Asus updated budget phones and left the top dogs. A lot of the posts about zentalk lack precision, and are either heavily tired towards Asus (for zenpoints), or against it.. To be just, after using phone from big names, I always go back to Asus. I used 4 different generations of phones and tablets, and my experience was mostly positive. I might try huawei, xiaomi or one+ next time, but I'm pretty sure I'll go back to Asus after ;) F205 Asus Zenfones should have AMD RYZEN processors with VEGA Integrated Graphics, Blending out Snapdrago @n from this universe v22717 Ardiant, 27 Feb 2019 So which means there's no android pie last for Zenfone 4 (ZE554KL), Zenfone 4 Selfie Pro (ZD5 ... furthermore don't think so . . . The list is not really accurate with that - Clear Soft Bumper - posting... (I've never seen this moderator). but i think you know the ZenFone-fix product is better, than a person at ASUS. :) A so that means no android pie updates for Zenfone 4 (ZE554KL), Zenfone 4 Selfie Pro (ZD552KL) and Zenfone 4 Pro (ZS551KL)? When update on at max m1? Zenfone max m1 when update is coming remember that the unfortunate asus asus phone, carrying the burden of the nomenclature convolved into its parent company as well as again to get the stable version of pie? Yes, we are talking about the Zenfone 4 from OEM in Taiwanese (to be exact, the 2017 edition). Asus ZenFone 4 (2017) Similar to the saga of ZenFone 5, Asus actually launched another phone called ZenFone 4 back in 2014. The older review was walked by the Intel Atom Z2520 platform and ran a heavy version of the Bait UI on top 4.3 Jelly Bean (later upgraded to KitKat). On the other hand, true fourth generation ZenFone debuted in 2017, along with a bunch of variants. ZenFone 4 Pro, the ship in their midst, recently received a minor security update. But what about the long-anticipate Android OTA pie? ZenFone 4 Android pie beta update ad piunikaWeb readers should remember their chenanigans regarding the pie for the 4 line ZenFone. Initially to publish a stockish (no bait UI) must update, update, it's back, and re-release the same. However, there is no good ETA on the arrivals to update stable. Users have other variants, such as the ZenFone 4 Selfie/Selfie Pro and ZenFone 4 Max/Max Pro are absolutely clueless on the jump of their phone. Asus ZenFone 4 Selfie Pro Amidst this precarious situation, Asus announced new updates for both the ZenFone 4 Regular 4 as well as the ZenFone 4 Selfie 4. Built to new

boost the security patch level of both the phone 5 July 2019 – all the way from May. Source In case of ZenFone 4 Selfie Pro, the internal software version changed from 71.50.395.82 to 71.50.395.89. On the other hand, ZenFone 4 gets 15.0610.1907.32 from 15.0610.1905.28. Sources such as for each the typical formula in OTA, these updates will begin to hit a small number of random users in the first batch. The Wider Rollout should be expected in a week or so, and then Asus will upload the full firmware on specific support pages. But these new builds are still based on Android Oreo. The SD630/660 of ZenFone 4 and SD625 in ZenFone 4 Selfie 4 are perfectly able to run Android Pie, yet Asus is taking months to deliver the pie update. Let's hope for the best. @ follow @PiunikaWeb PiunikaWeb is a unique initiative that mainly focuses on investigative journalism. This means we do a lot of hard work to come up with news stories that either 'exclusive,' 'break,' or 'healing' of nature. Maybe that's the reason why our job was chosen by the likes of Forbes, Foxnews, Gizmodo, TechCrunch, Engadget, The Vegetator, Macrumors, and more. Have to take a tour of our website to get a feel of our work. But if you like what we do, stay connected with us on Twitter (@PiunikaWeb) and other social media channels to receive updates on the stories we publish. Want to work for PiunikaWeb? You will be happy to know we hire. A new software update is now tablet for ASUS ZenFone 4 Selfie Pro (ZD552KL). This update is doing its way on-the-air with WW software versions - 71.50.395.80. It carries the 2019 security patch along with audio performance and updated APN. The software is based on Android 7.0 Nougat. This is an incremental roll that will happen to users gradually all over the globe. So if you have the patience you can wait for it to hit in automatically. Otherwise, go to Devices > General > On Phone > Update Center. Then type on update system > Check for update. This will now search for software updates WW-71.50.395.80 software. If you see it available, then to download it, use a Wi-Fi connection. Of course, the software OTA file size is at 368 MB, so downloaded via Wi-Fi will save your carrier charges. Also, make sure you have sufficient battery charges of 50% or more before installing the OTA. Now everyone won't receive an automatic update at one time. If you prefer a more instant update to the latest software, we've got you covered. You can manually download the software version for ASUS ZenFone 4 Selfie Pro and manually install it. Basically, you have to make use of the Odin flash firmware tool. Steps to install Asus ZenFone 4 Selfie Pro Update Software Either you can use the upgrade by recovery method or the separate ADB method. We will discuss both in short and learn the step-by-step process. Before you go to follow a few points and grab some tools you'll need while you follow either of the flashing methods. Pre-Condition supports for Asus ZenFone 4 Selfie Pro (ZD552KL) to charge your device at 50% or more. Your device must run on stock ROM (for method 1) before upgrade, take a complete backup of your data. Disclaimer: We are at GetDroidTips will not be responsible for any bricks/damages to your phone during/after installing this ROM. Method 1: Upgrade via Recovery: Download microbes 71.50.395.80 from the download section above and move it to your device storage. Now we need to enter the device in the recovery mode. To do so, Switch to Phone > Keep and Long Power button + Volume Up Now in the recovery menu, select the option Of Apply update from sd card. Now Select update.zip OTA firmware file which you downloaded. Wait for sometime as the installation process completes. Now reboot your phone to complete the process. That's it. Method 2: Upgrade via ADB Sideload: If you are running Custom ROM and want to install this firmware, then you can simply upgrade your device by following this method. Follow the link to know the process step-by-step. How to Sideload ROMs and Mods using ADB Sideload I hope this guide has been useful to upgrade your device to version WW-71.50.395.80. WW - 71.50.395.80.
